terms of sale

TERMS OF SALE:

- The present price list is effective as of February 17, 2025.
- This is a public price list tax free, packing included.
- The indicated prices are susceptible to be modified based on the costs of raw materials, in case the company is forced it. Please consult the price list on our website before making a budget, to ensure that references and prices are correct.

ORDERING PROCEDURE:

- All orders must be done by a written form, either email (export@st-systemtronic.com) or fax (+34 961854482), indicating:
 - A - product name and reference
 - B - model
 - C - finish / colour
 - D - number of items
- Orders modifications or cancellations will not be accepted 48 hours after the order confirmation.
- Samples orders will be charged as regular ones.

MINIMUM ORDER:

- Depending agreed on sales conditions.

SPECIAL ORDERS:

- For special orders or modifications in any of our products (finishes, dimensions, etc.), consult SYSTEMTRONIC for a previous quotation and delivery time.
- All special orders will be payed in advance by a bank tranfer (€), when confirming it. No additional discounts will be applied.

PAYMENT CONDITIONS: SWIFT BANK TRANSFER:

- SYSTEMTRONIC doesn't accept sharing bank expenses; we expect to receive the total amount of invoices in the bank transfer.
- First orders will be paid by a swift bank transfer (€) in advance of the total of the amount of the invoice.
- Payment form for following orders will be negotiated between SYSTEMTRONIC and its clients.
- Products remain of SYSTEMTRONIC's property until the invoice is fully paid.

terms of sale

PRODUCTION PERIOD:

- Between 4 and 6 weeks after order confirmation.

DELIVERY CONDITIONS:

- INCOTERMS 2010: EX-WORKS (EXW).

TRANSPORT:

- Damages needs to be reported (including the pictures) by fax or email within the following 24 hours once the order is received.
- Deliveries to private addresses will carry a 100 % increasement in the transport cost.

PACKING:

- In those orders that need to be shipped in special wood crates, the cost of the special packing will be charged in the invoice. Must be confirmed with the order.

WARNING:

- SYSTEMTRONIC reserves the right to make any technical, dimensional or esthetic modification in the manufactured products without prior warning.
- Any type of claim related to the manufactured products must be notified within the term of the following 8 days to the delivery of the merchandise, and under no concept we will accept claims past this time.

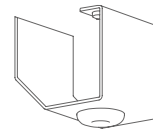

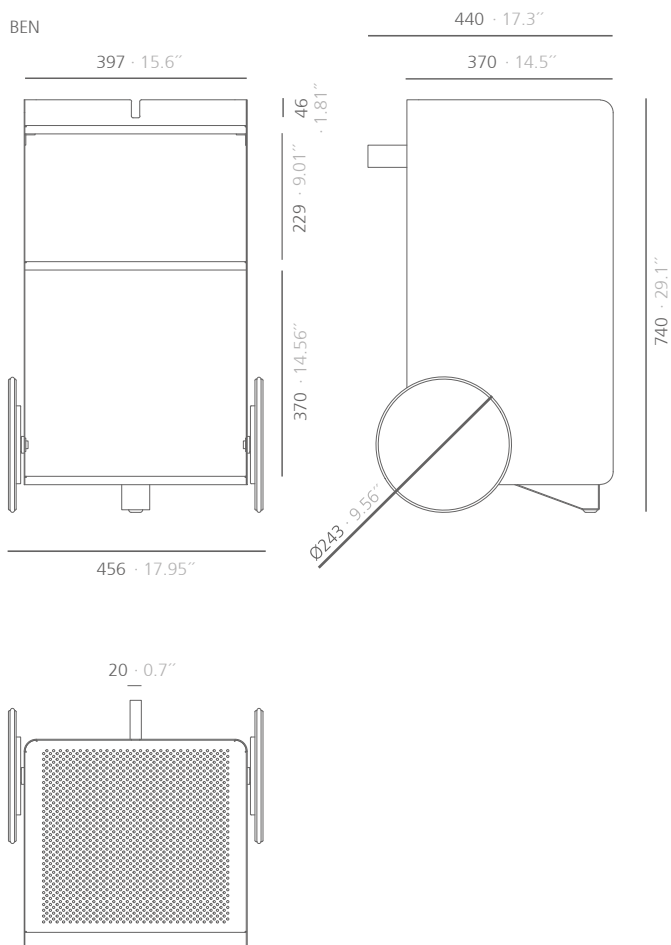

WARRANTY:

- SYSTEMTRONIC guarantees the quality of its products throughout the manufacturing process and the products components, expecting a responsible use of each item based on its specific characteristics.
- Defects caused by a bad use, hits, cleaning products or extreme weather conditions are not covered.
- The warranty is valid for 36 months from the date of SYSTEMTRONIC's invoice.

ben

Ben, versatile, compact auxiliary furniture, easy to move.
It stands out for the size of its wheels finished in natural oak and its knob made of solid natural oak wood.
Manufactured in painted steel finished with thermo-hardened powder paint lacquered in the oven.

The design includes a fixed front foot.

To favor the movement of the trolley in its upright position, the possibility of replacing the fixed foot with a Ø 4 mm wheel is offered (BENRUAD).

hold

Due to its design and functionality this auxiliary element fits perfectly into multiple spaces: bedrooms, kitchens, bathrooms, offices...

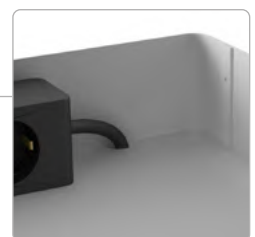

Available in three sizes: Hold High, Hold Office and Hold.

They are covered at the top with a methacrylate lid forming a drawer to place things. this top has a hole that allows the cabling.

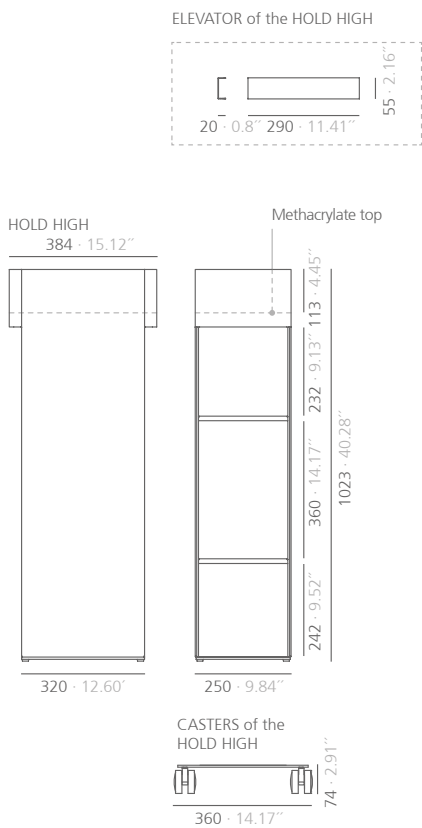

Exclusively for Hold High (due to its deeper drawer) an accessory is attachable to raise the lid a little. This is convenient if you want to put a coffee maker.

To facilitate the mobility of each of them you can add their wheels.

Manufactured in folded steel sheet and coated with polyester paint.

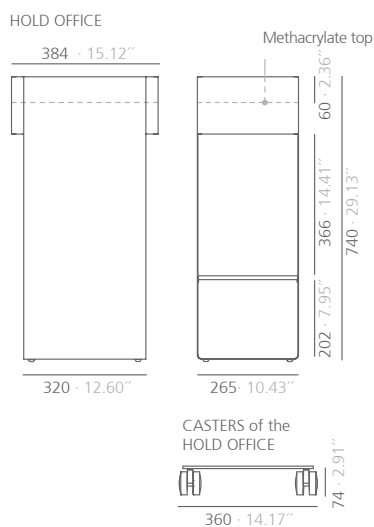

The methacrylate tops of the Hold High, Hold Office and Hold allows the cabling. It doesn't include power strip.

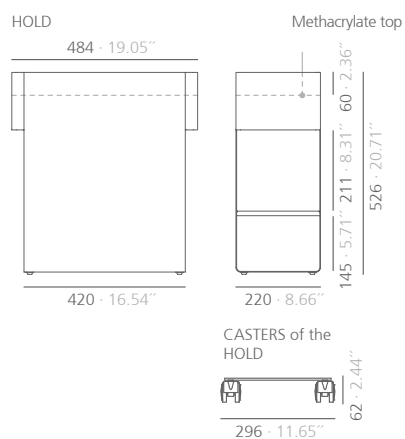

For its use in humid zones, an additional primer process is required before the paint. For finishes and special dimensions please consult.

baldas

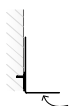

Modular shelves of linear aesthetics in vertical and horizontal disposition, which allow the free composition of them to suit the needs of each space. Produced in aluminum.

-The shelves consist of levelling supports that, once already perforated in the wall, allow its adjustment in a maximum margin of 12mm vertically to ensure that the shelf is straightened to the desired height.

-With the supports already anchored, the shelf can be adjusted by moving it a few millimetres to the right or left, to attach it to the adjoining shelf, or on the other hand, if desired, to leave space between them.

-In case of accidents, such as it could be a hit, the shelves have been designed with a counter-system that prevents the shelves from being removed once fixed.

Material: Aluminum sheet

sita

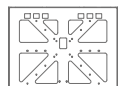

Screen in the Air, (Sita) is a support for televisions and monitors versatile and ideal both for houses, common zones or hotel rooms. It stands out for its elegant back which hides electrical connections providing an well-kept look. To include de CVD and HI-FI equipment, exist a version with a shelf, or you can attach a container module that completes the set. Mounting interface standard VESA 75, 100, 200, 300 and 400, with possibility of VESA accessory for 600 and 800. The monitor can rotate 240°. Its wheels allowed its movement. Produced in steel.

maximum screen rotation: 240°
furniture movement: forwards and backwards

Its design includes 4 small wheels which facilitate forward and backward movement. For a rotary movement and larger displacements, SITARUEDAS accessory is required.

SITA's standard mounting interface is for VESA 75,100, 200, 300 and 400. For VESA 600 and 800, SITAVE accessory is required.

Explanation of the VESA assembly standard

All the SITA supports are compatible with the VESA mounting standard.

What is the VESA standard?

The VESA mounting standard defines the distance at the origins between the 4 holes on the back of the TV (horizontal distance x vertical distance). VESA is a standard measurement for media and other mounting systems for most TV brands. The most common VESA measures are: 200x200 for Televisions up to 32 inches, VESA 400x400 for Televisions up to 60 inches and VESA 600x400 for Televisions with larger screens up to 84 inches.

TVs can be hung on the SITA TV stand in different ways according to the VESA measure that the TV complies with, so it is important to know this information before buying SITA support. If your TV is VESA 600 or VESA 800, buy the SITAVE accessory that adapts the SITA support to these dimensions. If your TV complies with VESA lower than VESA 600, you do not need this accessory.

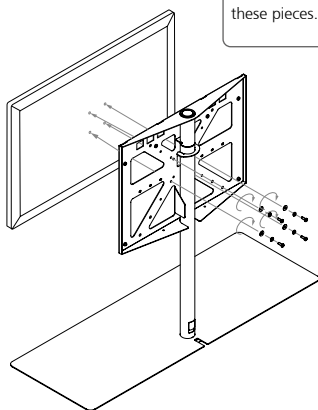

Where can I find the VESA dimensions of my TV?

TYPES OF SUBJECTIONS ACCORDING TO VESA (Reduced assembly instruction)

VESA 75, 100, 200 y 300.

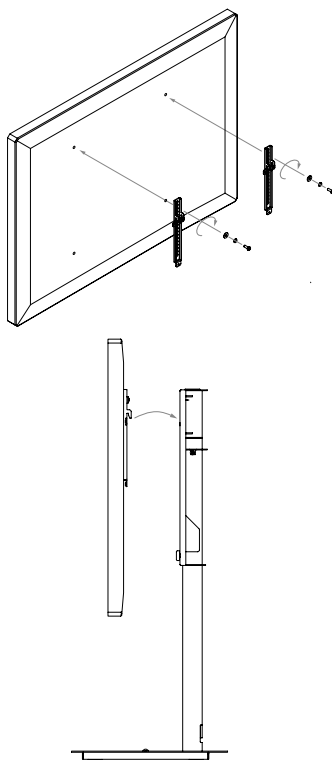

-Directly screw the TV to the SITA cabinet.

Hanging the TV in this way we do not need these pieces.

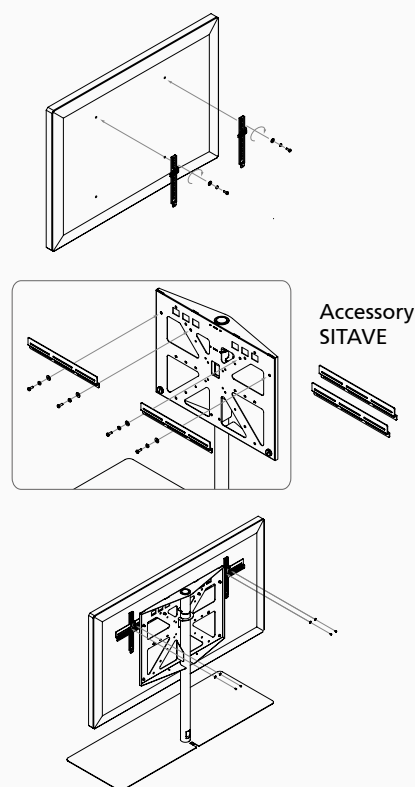

VESA 200, 300 y 400.

-Fasten hooks to the TV to hang the TV to SITA. This option allows to adjust the height of the screen.

VESA 600 y 800 Necessary accessory SITAVE

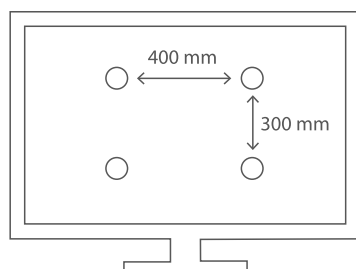

-Screw hooks to the TV and guides to the SITA to hang the TV. The screen can be adjusted in height.

INFORMATION:

The strips that are screwed to the TV allow to adjust it with the back cover of the SITA (covering all the cables) and leaving it fixed in height. The strips can be screwed to various heights with a maximum margin of 200 mm between the highest and the lowest height.

VESA 400X300

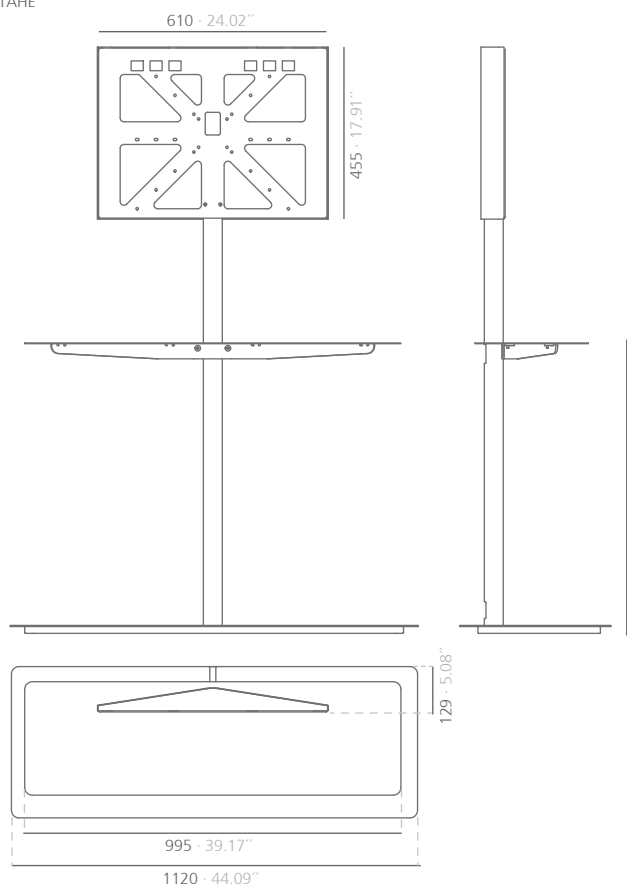

The fastest and easiest way to find the VESA measurement of your TV is by measuring it manually. You can easily find the four holes on the back of your TV. First measure the distance between the holes horizontally, then measure the distance vertically. It's that simple to know the VESA format of your TV, in just a few minutes.

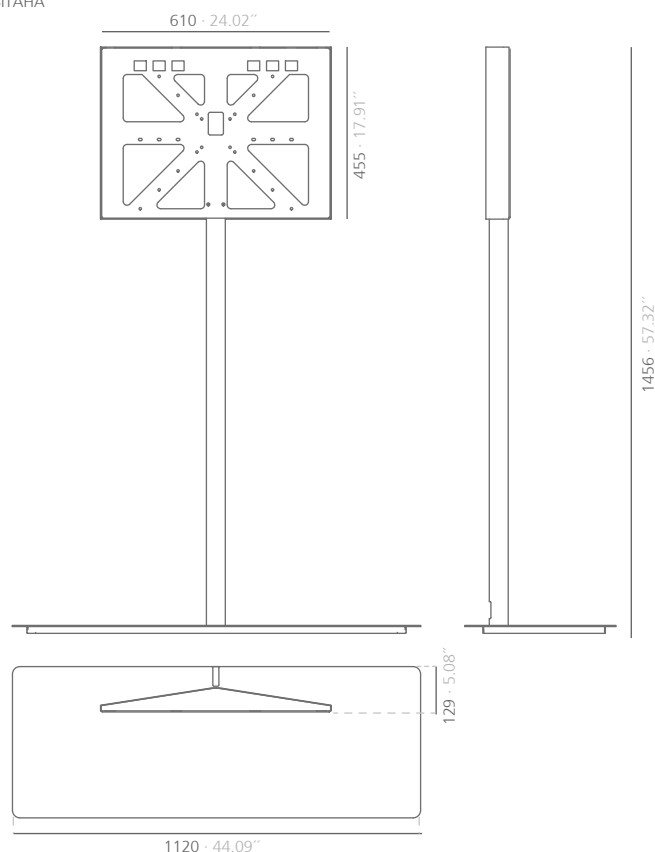

A graphic example to the left:

Example: Horizontal distance 400 mm, vertical distance 300 mm, VESA measure in this case would be 400 x 300.

SITAHE

SITAHHA

**IMPORTANT:**

Its design includes 4 small wheels which facilitate forward and backward movement. For a rotary movement and larger displacements, SITARUEDAS accessory is required.

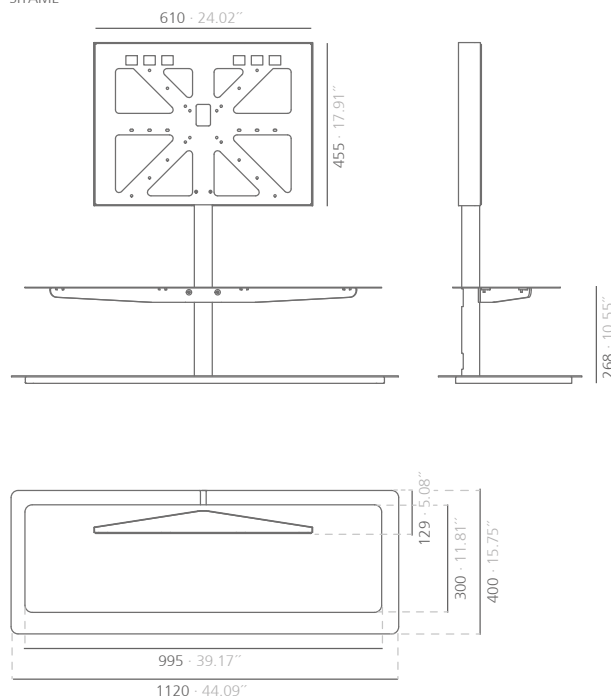

SITA's standard mounting interface is for VESA 75,100, 200, 300 and 400. For VESA 600 and 800, SITAVE accessory is required.

SITAHE: For TVs with a maximum height of 810 mm and a maximum weight of 40 kg (TV ≤ de 65").

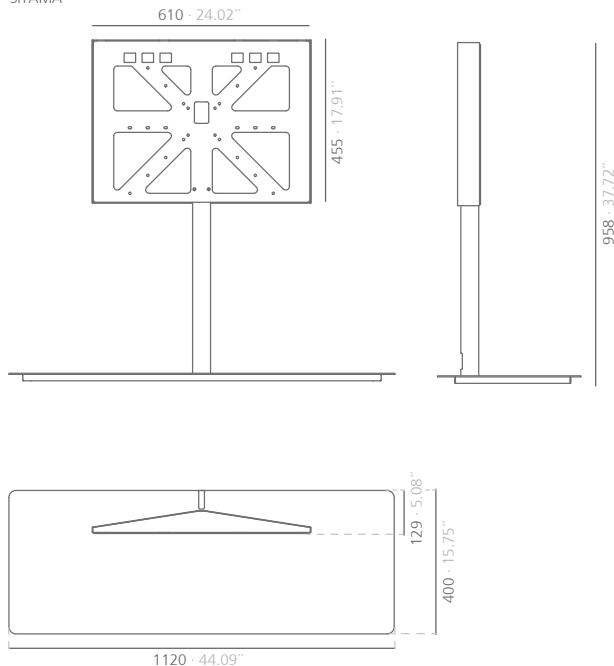

SITAHHA: For TVs with a maximum weight of 40 kg (TV ≤ de 75").

fum

Aluminum painted ashtray column that includes a sealed tank that reduces smoke and odors. Two formats: to wall or standing, being able to screw to floor.

Now also available new standing version with double capacity. An essential element for outdoor spaces projects.

MATERIALS

This outdoor adapted ashtray consists of a painted aluminum column and a stainless steel lid.

When it is self-supporting its base is painted galvanized steel, when it is wall mounted, the support that is screwed to the wall is made of stainless steel.

TOP COVER

The ash deposit is sealed with the top cover to reduce smoke and odors.

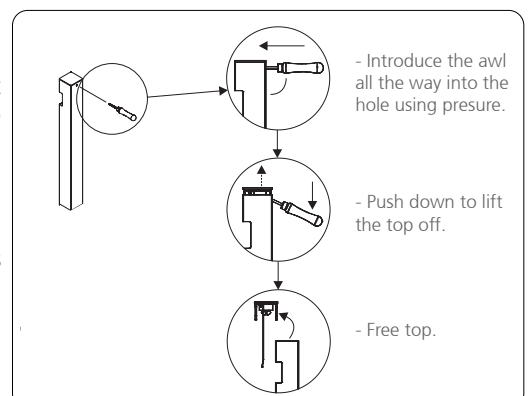

This lid, made of stainless steel, contains a tongue that serves as a counter-vent for the smoke. To release the lid, a punch is included which, by levering, opens the ashtray allowing the ash tank to be emptied.

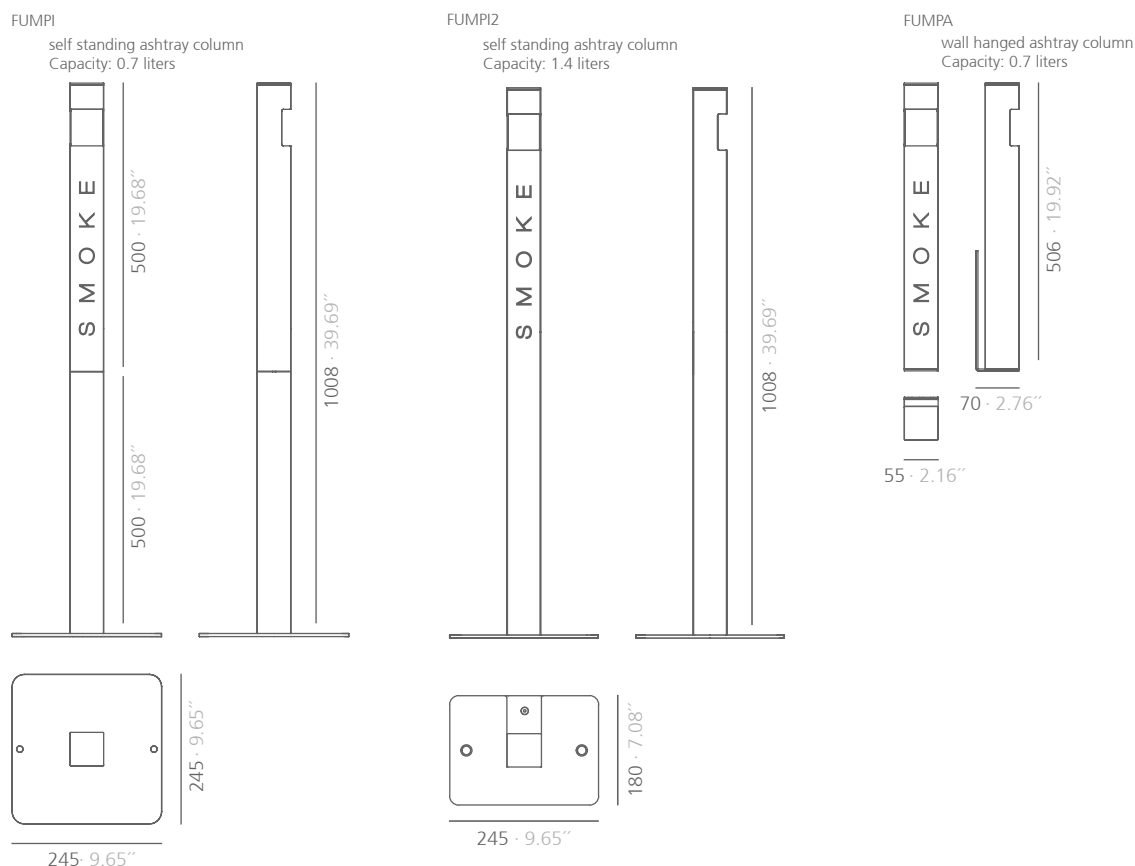

SCREWS AND ANCHORAGES

In the standing version, the base is adapted so that, if desired, it can be screwed to the ground. The hardware and anchors to fix the Fum ashtray to the floor is included. Wall screws and anchors are also included in the wall version.

VINYL

The word "SMOKE" is grey vinyl both when the Fum is black and when it is white.

drop top

Expanding the DROP collection, we present the litter bin that partially hides the waste and identifies it with a vinyl pictogram for its classification in: glass, organic, general, paper, plastic or aluminum. Designed so that they can be combined among them.

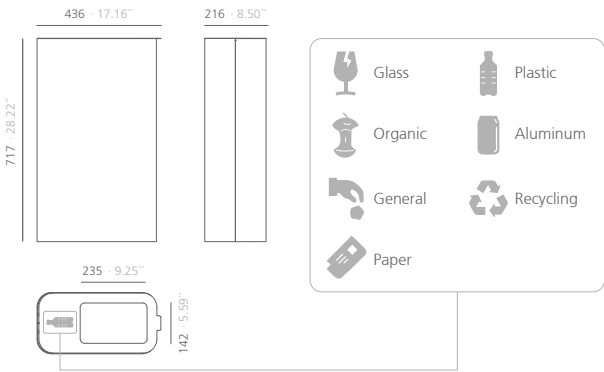

Made of galvanized steel and painted with thermo-hardened powder paint lacquered in the oven. Includes a galvanized steel inner ring that holds the bag.

62 liter bin capacity, for garbage bags starting from 50 liters.

drop top triple

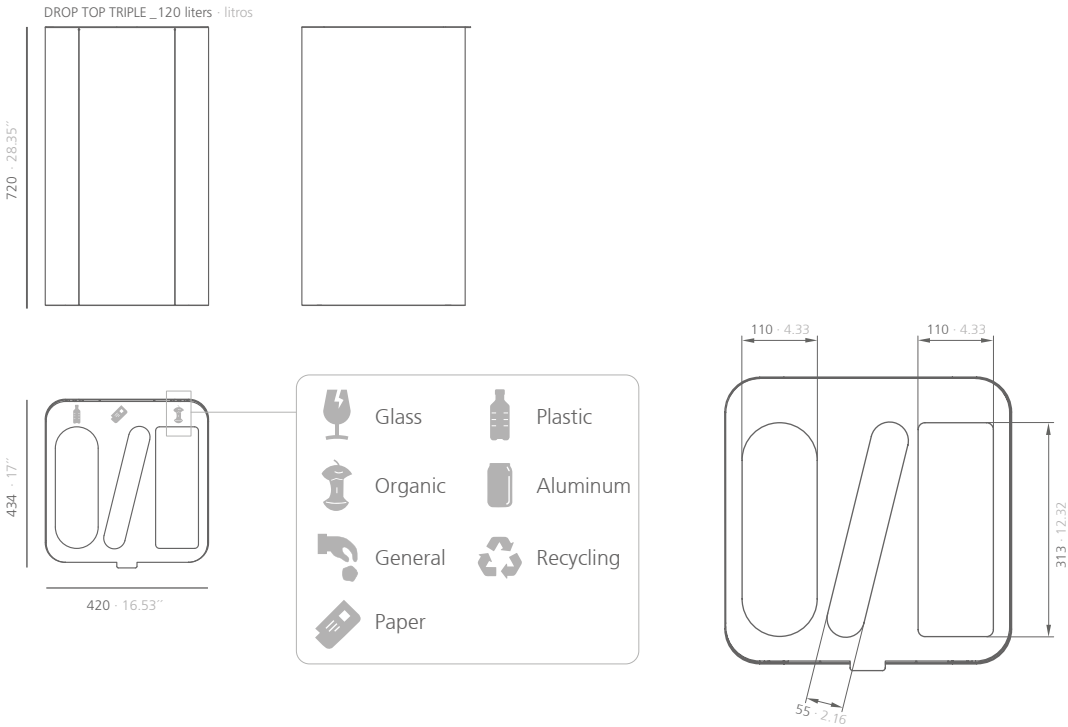

We present the Drop Top Triple bin that allows multiple recycling in a single container with 3 different compartments in the lid due to its geometric shape. The three cavities are identifiable with a vinyl pictogram to choose between: glass, organic, general, paper, plastic or aluminum.

Made of galvanized steel and painted with baked lacquered thermoset powder. It includes an inner ring of galvanized steel that holds the bag.

The total capacity of the three cavities is 120 liters. We recommend the use of garbage bags starting from 50 liters.

SOU

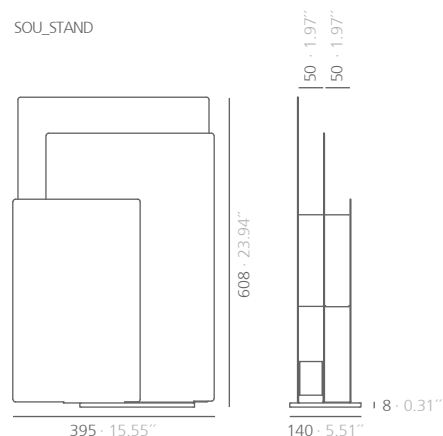

Umbrella stand composed by three painted steel panels thought-out for either big or small umbrellas. Two versions are available: standing or on the wall. The base and the middle panel can be painted in a second colour.

The SOU includes two removable containers to pick up the water. The smaller one it's located behind the front panel halfway up so the little umbrellas are accessible. The bigger container is located in the lower-inner part of the hind panel so the bigger umbrellas can fit well.

SOU_STAND

Capacity: from 6 to 8 large umbrellas
and 4 to 5 small umbrellas.

conee plant pot

Planters of the Conee family. They are about a frustoconical structure with the axis inclined composed by a bent plate of aluminum painted with polyester paint. Lateral inner closure from a reinforced joint rivet and a welded lower closure base skeleton of star shape supporting its legs with casters.

They include a saucer and a pot. In the case that the plate overflows with the water, the base of the skeleton star forms an openings where the water will fall to the ground, so the water will not stay stagnant in the plant pot.

Don't add the soil directly.
All the plants pots of the Conee family include a saucer and a pot.

		pot				saucer		casters			Maximum load capacity of each conee (kg)

flora

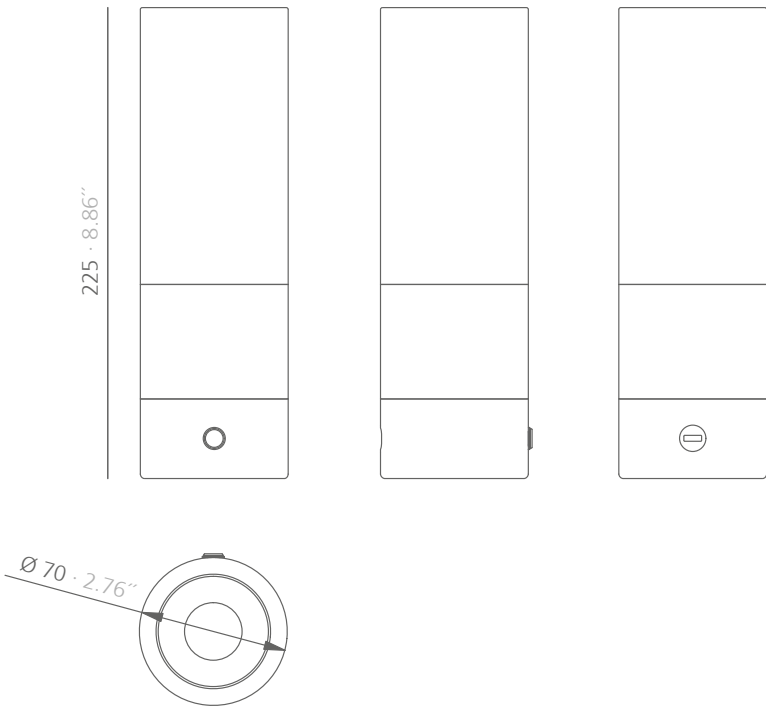

The Gallery Studio makes its debut in our catalog with Flora, a product that seamlessly combines two functionalities in a single body: lamp and vase coexist in this clean and innovative design solution.

This achieves bringing nature to any space, creating a warm, tranquil, and intimate atmosphere. With a simple, clean-lined style, Flora introduces a new everyday element that expands the boundaries of spaces. The perfect accessory to create distinct environments.

dina

The depth of the Dina tables allows their use in both contract and home spaces. Its rounded corners give it an organic and modern design. Available in three heights and four top sizes. The structure is made of extruded aluminum and its beveled top is made of MDF with an industrialized oak laminate finish.

Materials:

Structure: aluminum.

Table top: industrialized oak laminate.

Dimensions:

Dina XL: 1050x2000x900 mm 41.34x78.74x35.43" / 880x2000x900 mm 34.65x78.74x35.43" / 750x2000x900 mm 29.53x78.74x35.43"

Parallel

Available in two versions: a table stand and a planter stand. Both models are made of aluminum with a steel base, ensuring maximum durability and stability.

Thanks to its four wheels, it can be easily moved and adapted to various outdoor spaces. The tabletop, made of FENIX, stands out for its ultra-matte finish, pleasant touch, and fingerprint resistance.

The PLANTER model includes an inner planter and a water collection tray.

Materials:

Structure: aluminum

Base: steel

Tabletop: FENIX

Inner planter and water collection tray (only in PLANTER model): polypropylene

Dimensions:

PARALLEL PLANTER: 650x650x740 mm

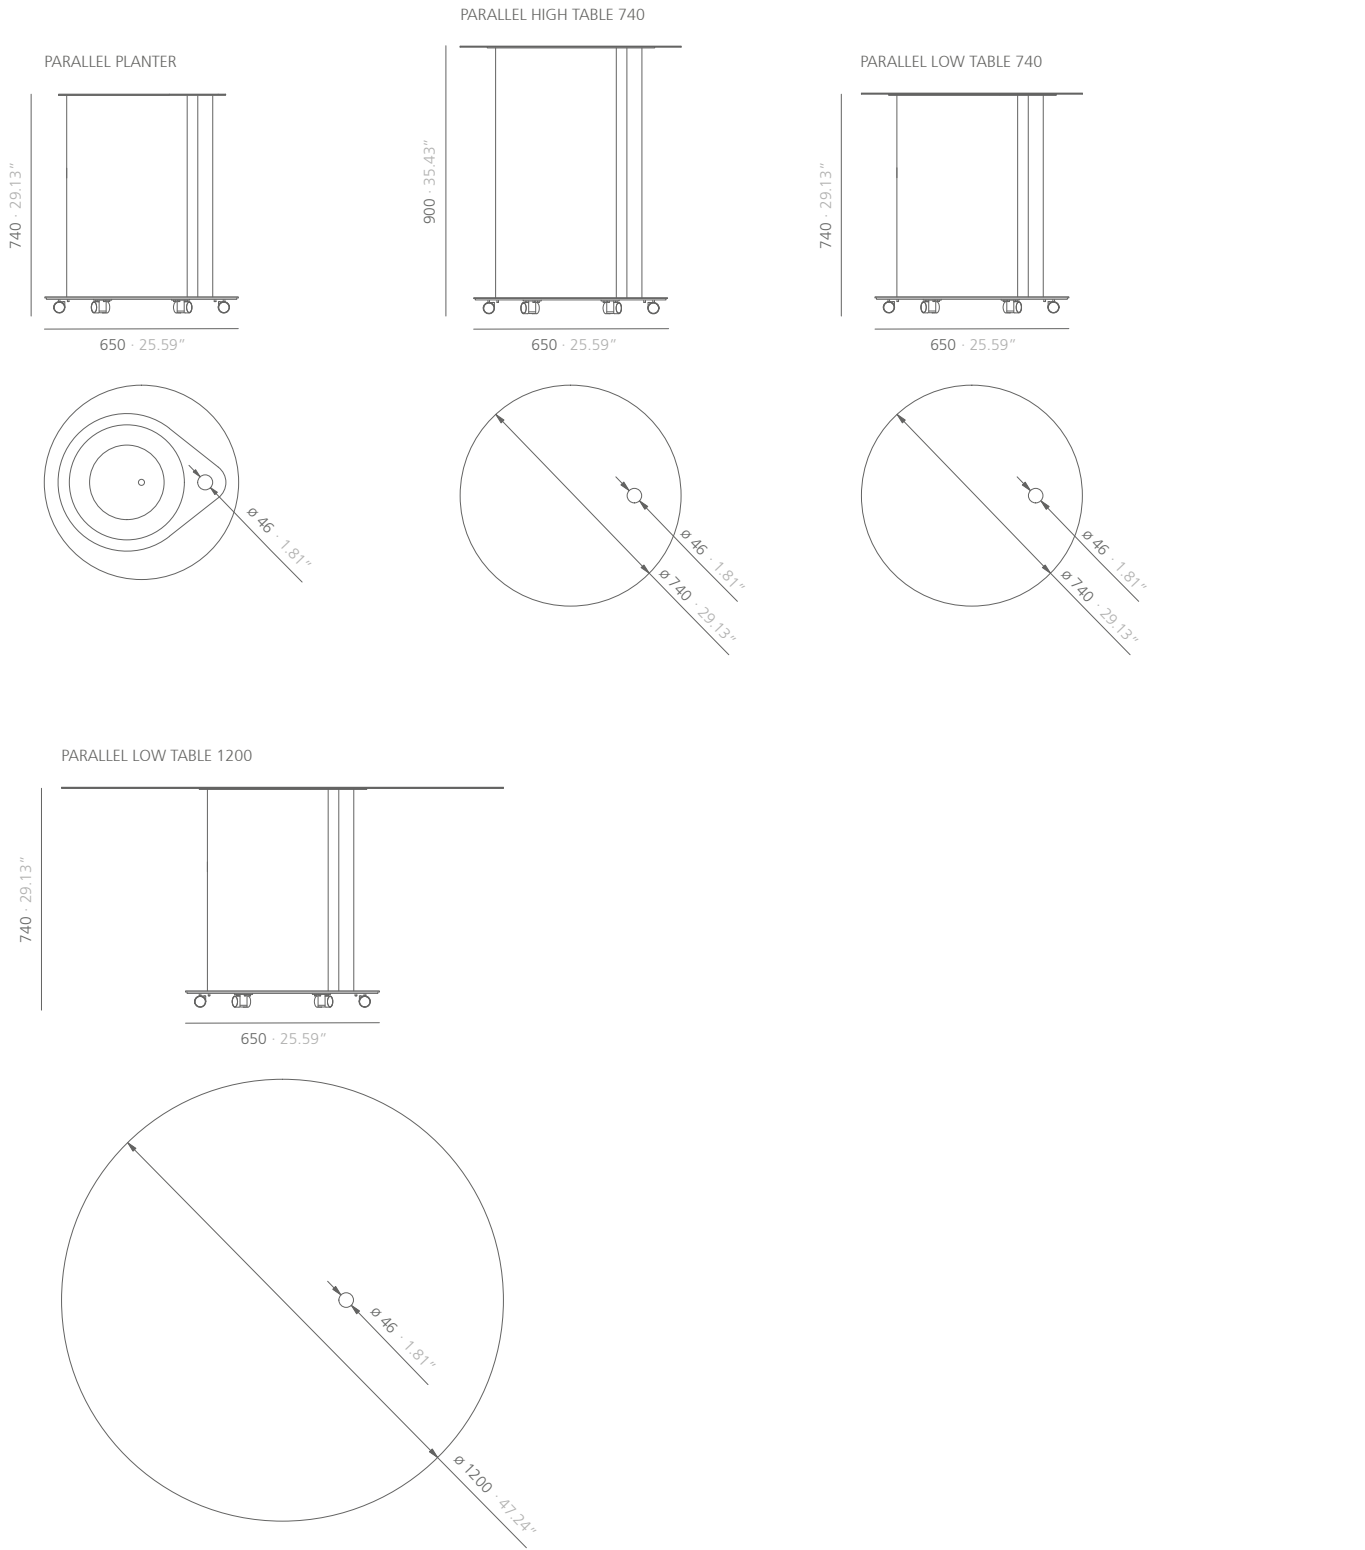

PARALLEL HIGH TABLE 740: 740x740x900 mm

PARALLEL LOW TABLE 740: 740x740x740 mm

PARALLEL LOW TABLE 1200: 1200x1200x740 mm

nube

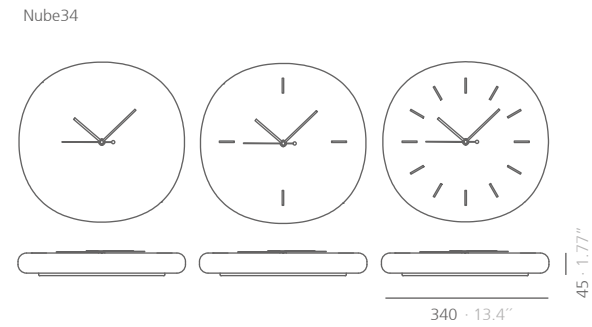

Irregular circular wall clock 45 mm thick. Made of MDF lacquered in different colors or solid natural oak with matte transparent varnish.

The clocks, except the oak one, have two passes of polyurethane-based lacquer.

The needles are made of 5 micron thick aluminum. In its version with stripes, these are made of adhesive vinyl.

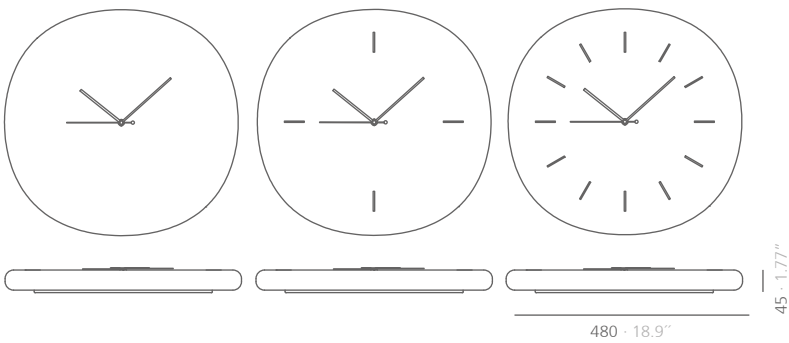

Available in two sizes.

Requires one AA battery (not included).

office set

Set of accessories that allows the organization of office items in working spaces.

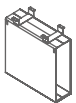

SWIRE allows to pass cables through the tabletop as a window.
Material: Steel
Dimensions: 100x240 mm 3.94x9.45"

OMEGA guides the cables under the table.
Material: Steel
Dimensions: 90x159x990 mm 3.54x6.26x38.98"

CPURD contains the computer tower and allows its mobility.
Material: Acero
Dimensiones: 523x514x150-250 mm

CPUSTC is screwed to the table and supports the computer tower, so the set is hanged.
Material: Steel
Dimensions: 523x497x150-250 mm 20.59x19.57x5.9-9"

WIRE Freestanding aluminum column to hide cables, two versions: single or double. It includes a black brush on its side that allows inserting and removing cables easily. Its base is designed for facilities with technical floors.
Materials: Column: Aluminum; Base: Steel.
Dimensions:

250x120x659 mm 9.84x4.72x25.94"
250x120x709 mm 9.84x4.72x27.91"

SUPPORT This laptop stand allows you to adapt ergonomically correct position while working.
Material:

Column: Aluminum anodized silver matt finish.
Tray and base: Painted steel.

Dimensions: 360x334x209 mm 14.17x13.15x8.23"

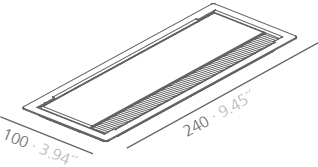

SUPP Elevator for computer screens manufactured with a single steel plate that forms a free space to place the keyboard.
Material: Steel
Dimensions: 500x280x75 mm 19.68x11.02x2.95"
